

Ultimate Control Tower Actionable Insights Powered by InterSystems IRIS Data Platform

Most companies face supply chain challenges because they lack visibility, timely access to data, and the ability to make informed decisions. The need for a “sense and respond” solution has never been more critical. This leads most supply chain practitioners to ask, “How can we leverage data from our dynamic supply chain to make prescriptive decisions that impact our organization?”

InterSystems® has the answer. In today’s world, **accurate, real-time, usable data** is essential to running an effective supply chain. At InterSystems, we believe in providing a platform that efficiently accesses the data, moves it through a user-driven intelligent engine, and identifies critical problems in the form of exceptions and prescriptive solutions for action.

Today, InterSystems is helping supply chain customers in the retail, consumer packaged goods (CPG), manufacturing, and healthcare sectors. Our solution provides unparalleled real-time orchestration.

InterSystems IRIS Data Platform Provides Ultimate Control Tower Insights

InterSystems IRIS data platform takes a unique approach to real-time supply chain orchestration that provides actionable insights across the enterprise.

Supply Chain Business Challenges

- Lack of accurate end-to-end visibility and reporting
- Data silos, along with difficulty integrating and normalizing disparate data
- Difficulty performing analytics to support the business in a timely manner
- Challenges with data latency
- Significant manual processes require data manipulation and corrections
- Delays in assessing supply chain disruptions in real time with actionable insights and prescriptive analytics

The Solution We Provide

InterSystems IRIS® data platform for supply chain is a next-generation data platform for implementing smart enterprise data fabric architectures. It provides real-time, intelligent, actionable insights into supply chain information, disruptions and constraints across the entire enterprise and global ecosystem, accelerating time to value.

Where We Provide the Most Impact

Plan

- Integrated Business Planning
- Demand/Forecasting
- Supply/Production
- Inventory
- Capacity Planning

Source

- Sourcing
- Strategies
- Supplier Selection
- Supplier Performance

Operate/Make

- Lean Operations
- Performance and Yield Improvement
- Digital Twins
- Robotics

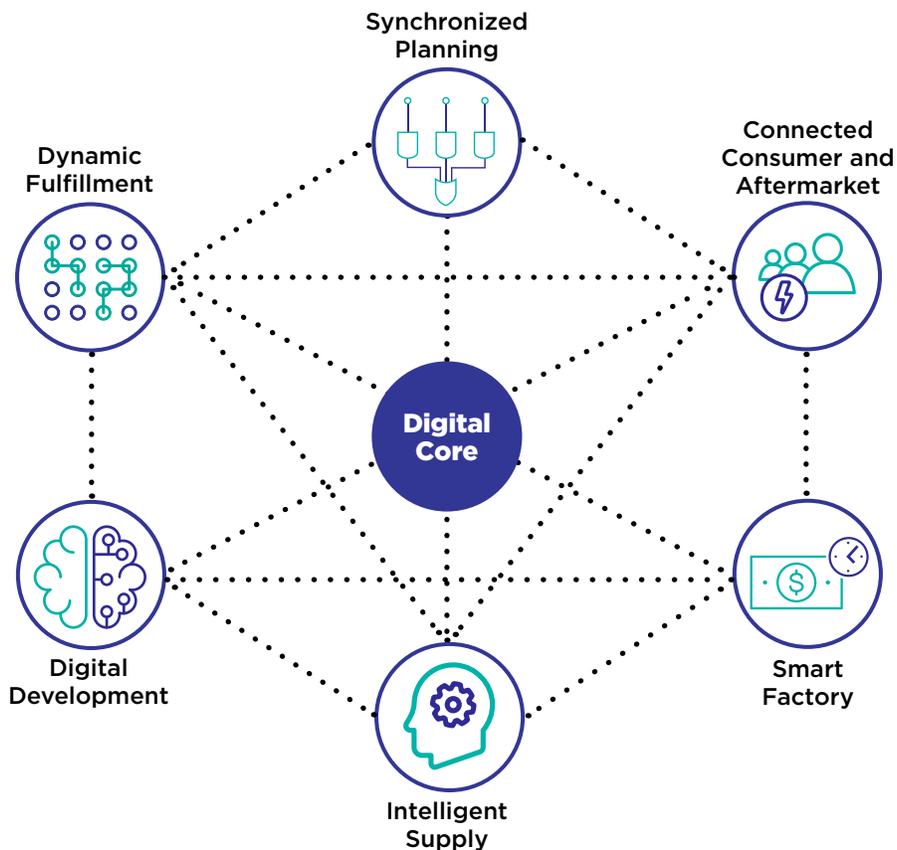

Deliver

- Logistics Operations
- Distribution/Fulfillment
- DC Optimization
- Replenishment
- WMS/TMS

Return/Service

- Repair Operations
- Service Parts Management
- Distribution

Digital Supply Chain Collaboration

InterSystems Worldwide

- Leading provider of data technology for extremely critical data in the supply chain across healthcare, manufacturing, retail, and CPG sectors
- Recognized by Forrester, Gartner Peer Insights, Gartner Magic Quadrant, and IDC as a leader in the industry
- Award-winning, 24/7 support for customers and partners in more than 80 countries
- Privately held, stable, and profitable business built on partnerships since 1978
- Unparalleled performance, scalability, interoperability, reliability, and flexibility
- Offices in 26 countries

Our Key Benefits

- One platform that provides an infrastructure-agnostic single pane of glass
- No expensive tools to buy or integrate to get started
- Smart enterprise data fabric architectures
- Extremely fast “time to value”
- Adaptive Analytics services with embedded business intelligence solutions
- Lets you start anywhere in your supply chain and grow as needed
- Enables real-time and low-latency applications flexible user interface
- Provides proven, mission-critical reliability
- Simplifies owners’ TCO; highly resource-efficient
